Medical ethics is a system of moral principles that apply values to the practice of clinical medicine and in scientific research. Medical ethics is based on a set of values that professionals can refer to in the case of any confusion or conflict. These values include the respect for autonomy, non-maleficence, beneficence, and justice. Such tenets may allow doctors, care providers, and families ...

In moral philosophy, deontological ethics or deontology (from Greek Î´Î¿Î½Î¿Î»Î¿Î½, deon, "obligation, duty") is the normative ethical theory that the morality of an action should be based on whether that action itself is right or wrong under a series of rules, rather than based on the consequences of the action.. It is sometimes described as duty-, obligation- or rule-based ethics, because rules ...
