Radiation therapy or radiotherapy, often abbreviated RT, RTx, or XRT, is therapy using ionizing radiation, generally as part of cancer treatment to control or kill malignant cells and normally delivered by a linear accelerator. Radiation therapy may be curative in a number of types of cancer if they are localized to one area of the body. It may also be used as part of adjuvant therapy, to ...

Megavoltage X-rays are produced by linear accelerators ("linacs") operating at voltages in excess of 1000 kV (1 MV) range, and therefore have an energy in the MeV range. The voltage in this case refers to the voltage used to accelerate electrons in the linear accelerator and indicates the maximum possible energy of the photons which are subsequently produced.

Definition of adjuvant radiotherapy. The ASTRO/AUA definition of adjuvant radiotherapy (ART) is RT delivered post-prostatectomy to those patients with an undetectable PSA considered at higher risk of prostate cancer recurrence, usually within 6 months of surgery. In order to achieve consistency in the reporting and comparing of outcomes of both adjuvant and salvage RT, we recommend that a PSA ...

This textbook provides a fresh, comprehensive and accessible introduction to the rapidly expanding field of molecular pharmacology. Adopting a drug target-based, rather than the traditional organ/system based, approach this innovative guide reflects the current advances and research trend towards molecular based drug design, derived from a detailed understanding of chemical responses in the body.

Radiation therapy and cell death. Radiation therapy can kill cancer cells by a variety of mechanisms. The main goal of radiation therapy is to deprive cancer cells of their multiplication potential and eventually kill the cancer cells.

This Guideline is endorsed with qualifying statements by the American Society of Clinical Oncology (ASCO). Purpose. The purpose of this guideline is to provide a clinical framework for the use of radiotherapy after

prostatectomy in patients with and without evidence of prostate cancer recurrence.

História. A braquiterapia remonta a 1901 (pouco tempo depois da descoberta da radioactividade por Becquerel em 1896), quando Pierre Curie sugeriu a Henri-Alexandre Danlos que se poderia inserir uma fonte radioactiva num tumor. [17] [18] Descobriu-se que a radiação fazia com que o tumor reduzisse. [18] De forma independente, Alexander Graham Bell também sugeriu a utilização de radiação ...

Brachytherapie (altgriechisch βραχύς, brachys, deutsch –kurz, nah), auch interne Strahlentherapie, Therapie mit umschlossenen Strahlenquellen oder Kurzdistanztherapie, ist eine Form der Strahlentherapie, bei der eine umschlossene radioaktive Strahlenquelle innerhalb oder in unmittelbarer Nähe des zu bestrahlenden Gebietes im Körper platziert wird.

### **Brachytherapie – Wikipedia**

La curiethérapie, parfois appelée brachythérapie (du mot grec –Brachy– qui signifie « distance courte ») ou radiumthérapie, est une technique de radiothérapie mise au point à l'Institut Curie durant laquelle le radio-isotope est placé à l'intérieur ou à proximité immédiate de la zone à traiter. La curiethérapie est couramment utilisée comme un traitement efficace pour ...
