There are many 3D printing technologies available, and each technology has its strength and weakness. The 3D printing of sand moulds, by binder jetting technology for rapid casting, plays a vital role in providing a better value for the more than 5000 years old casting industry by producing quality and economic sand moulds.

Frost heaving (or a frost heave) is an upwards swelling of soil during freezing conditions caused by an increasing presence of ice as it grows towards the surface, upwards from the depth in the soil where freezing temperatures have penetrated into the soil (the freezing front or freezing boundary). Ice growth requires a water supply that delivers water to the freezing front via capillary ...

Frost heaving - Wikipedia

Asphalt emulsions are manufactured by milling asphalt cement (bitumen) into microscopic particles and dispersing them in water using a chemical emulsifier.

A ricochet (/ ˈr ɪ k ɔːt / RIK-É™-shay) is a rebound, bounce or skip off a surface, particularly in the case of a projectile. Most ricochets are caused by accident and while the force of the deflection decelerates the projectile, it can still be energetic and almost as dangerous as before the deflection.

To test the hypothesis that mode of binding to the TfR would affect transcytosis, we engineered two different types of Brain Shuttle constructs with a single-chain (sc) Fab fragment of an anti-TfR monoclonal antibody (mAb) fused either to one or both C-terminal ends of the heavy chain of an anti- $\text{A}\beta$ mAb (mAb31).
