Young children in communities facing socioeconomic disadvantage are increasingly targeted by school readiness interventions. Interventions are stronger if they address stakeholders' priorities, yet children's priorities for early school adjustment are rarely accounted for in intervention design including selection of outcome measures.

Psychological trauma is a type of damage to the mind that occurs as a result of a distressing event. Trauma is often the result of an overwhelming amount of stress that exceeds one's ability to cope, or integrate the emotions involved with that experience. Trauma may result from a single distressing experience or recurring events of being overwhelmed that can be precipitated in weeks, years ...

According to anthropologist Maurice Godelier, a critical novelty in human society, compared to humans' closest biological relatives (chimpanzees and bonobos), is the parental role assumed by the males, which were unaware of their "father" connection.. In many cultures, especially traditional western, a father is usually the husband in a married couple.
