x Large airway reconstruction is difficult and requires a flap which will mirror the tissue variety. The main challenge is to keep the reconstruction stable and prevent collapse. In this report, the authors present a laryngotracheal reconstruction with a buccal mucosa-prefabricated medial femoral condyle free flap, after chondroma excision in a one-step procedure.

Purpose: This report details our experience with common femoral artery resection and Dacron interposition grafting in the management of vascular reoperations involving the common femoral artery. Design: Retrospective review. Setting: University teaching hospital. Subjects: Consecutive reoperative patients who had common femoral artery interposition grafting for arteriosclerotic occlusive disease ...

Interposition grafting for reoperation on the common

Endometriosis is a condition in which cells similar to those in the endometrium, the layer of tissue that normally covers the inside of the uterus, grow outside of it. Most often this is on the ovaries, fallopian tubes, and tissue around the uterus and ovaries; however, in rare cases it may also occur in other parts of the body. The main symptoms are pelvic pain and infertility.

Endometriosis - Wikipedia

INTRODUCTION. Postoperative peritoneal adhesions have important consequences to patients, surgeons, and the health system. The adhesions that form in the abdomen following abdominal or pelvic surgery are a normal response to injury of the peritoneal surfaces during surgery, and although adhesions have some beneficial effects, they also cause significant morbidity, including adhesive small ...

Postoperative peritoneal adhesions in adults and their

INTRODUCTION: Endometrial ablation is a procedure that surgically destroys (ablates) the lining of the uterus (endometrium). The goal of endometrial ablation is to reduce menstrual flow. In some women, menstrual flow may stop completely. In some

Indocyanine green fluorescence imaging is a surgical tool with increasing applications in colorectal surgery. This tool has received acceptance in various surgical disciplines as a potential method to enhance surgical field visualisation, improve lymph node retrieval, and decrease the incidence of anastomotic leaks.

Indocyanine green fluorescence imaging in colorectal

Urinary incontinence in men can be caused by functional abnormalities of the bladder or urethra, particularly in men with prostate disease. Men with urinary incontinence are more likely to report a lower quality of life and are at increased risk of institutionalization compared with men without ...

FLT3 gene mutation testing for acute myeloid leukemia (AML). Human chorionic gonadotropin (HCG), serial measurement to diagnose germ cell tumors in members with adenocarcinoma, or carcinoma not otherwise specified, involving mediastinal nodes, or to monitor treatment in members with known trophoblastic tumors (invasive hydatidiform moles and choriocarcinomas) and germinal cell tumors ...

Tumor Markers - Medical Clinical Policy Bulletins | Aetna

The incidence and prevalence of inflammatory bowel disease (IBD) has increased in recent years in several Latin American countries. There is a need to raise awareness in gastroenterologists and the population in general, so that early diagnosis and treatment of ulcerative colitis (UC) and Crohn's Disease (CD) can be carried out.
