Industrial design is a process of design applied to products that are to be manufactured through techniques of mass production. Its key characteristic is that design is separated from manufacture: the creative act of determining and defining a product's form and features takes place in advance of the physical act of making a product, which consists purely of repeated, often automated, replication.

Packed towers are used as contacting equipment for gas-liquid and liquid-liquid systems. The basic unit consists of: (1) shell, (2) packing (one or more sections), (3) packing support(s), (4) liquid distributor(s), (5) intermediate supports and redistributors, and (6) gas and liquid entrance and exit nozzles.

Chapter 9 Packed Towers - ScienceDirect

Carers play a vital role in supporting family members who are sick, infirm or disabled. 1 There is no doubt that the families of those with mental disorders are affected by the condition of their near ones. Families not only provide practical help and personal care but also give emotional support to their relative with a mental disorder.
