

the floating islands pdf

A floating island is a mass of floating aquatic plants, mud, and peat ranging in thickness from several centimetres to a few metres. Floating islands are a common natural phenomenon that are found in many parts of the world. They exist less commonly as a man-made phenomenon. Floating islands are generally found on marshlands, lakes, and similar wetland locations, and can be many hectares in size.

Floating island - Wikipedia

In speculative fiction, floating cities and islands are a common trope, which range from cities and islands that float on water to ones that float in the atmosphere of a planet by scientific or magical means. While very large floating structures have been constructed or proposed in real life, aerial cities and islands remain in the realm of fiction.
