nate system, suggests not only that the BF corticopetal system has a remarkable inhomogeneous organization, but also that this organization is reflected in the cortico-cortical connections, so far unremarked upon and thus unexplained. Our studies suggest that the cholinergic and non-cholinergic projections to the neocortex are not

The Rat Nervous System - Semantic Scholar

Nervous System • The ventricular (CNS) system is similar to that of other animals except the rat lacks a foramen of Magendie. • The hypophysis in the female is greater in weight than the male. • The surface of the rat cerebrum, as with most lower mammals, is smooth without the complex sulcal pattern seen in humans
Endocrine System

RATS - BIOLOGY & HUSBANDRY - Research

Central Nervous System. • Brain o Brain stem • medulla, pons, midbrain o Diencephalon • thalamus & hypothalamus o Cerebellum o Cerebrum • Spine o Spinal Cord. Meninges. Meninges are the three coverings around the brain & spine and help cushion, protect, and nourish the brain and spinal cord.

The Nervous System - Science Olympiad

Neuroscience comprises increasingly diverse fields ranging from molecular genetics to neurophilosophy. The common thread between all these fields is the structure of the human nervous system. Knowledge on the structure, connections and function of the brain of experimental animals is readily available.
