THE USE OF CRITICAL THINKING IN SOCIAL SCIENCE - ERIC

In social science, the term –reductionism–™ is used largely pejoratively, as in the accusation of –biological reductionism–™ or –psychologism–™ used by sociologists against those who seek to explain social behaviour in biological or psychological terms.

Reductionism in Social Science - Lancaster University

–Much headway can be made in applying social science without fully solving such problems.–• Over the decades in the social sciences, the tendency has been to develop internal concerns, to define their own problems and not to accept, as their subject matter, the social problems of the contemporary and surrounding

society.

Social Science and Contemporary Social Problems – Items

In this chapter I answer this question with an emphatic yes and portray scientific thinking as a human activity engaged in by most people, rather than a rarefied few. As such, it connects to other forms of thinking studied by cognitive psychologists, such as inference and problem-solving.

creativity in the context of school science (see next section). Suffices to say here, it makes sense to view creativity as a mental ability emerging from a social context, which is, anyway, compatible with the social dimension of science itself. In actual fact, the view that science is a social activity – constitutively
