In linguistics, syntax (/ ˈɛː s ɛː n t ˈiː k s /) is the set of rules, principles, and processes that govern the structure of sentences (sentence structure) in a given language, usually including word order. The term syntax is also used to refer to the study of such principles and processes. The goal of many syntacticians is to discover the syntactic rules common to all languages.

Syntactic Structures is a major work in linguistics by American linguist Noam Chomsky. It was first published in 1957. It introduced the idea of transformational generative grammar. This approach to syntax (the study of sentence structures) was fully formal (based on symbols and rules). At its base, this method uses phrase structure rules. These rules break down sentences into smaller parts ...
